

The eyePIX Handheld is the new exciting product to be released by Iris Supplies. This product was designed to be inexpensive while maintaining a high standard of image quality required by all our Iridology Cameras.

Unlike other cheaper Handheld Iridology Cameras on the market, the eyePIX Handheld uses a superior lighting system with flash to take true color images with the correct exposure. It also features a high quality 8 megapixel SLR Digital Camera to guarantee high resolution images. This product is very portable and is now the lightest and smallest of our range.

The eyePIX Handheld can be used for Iridology, Sclerology & Animal Iridology. It can also be convenient for young children and bed ridden people.

If you're an Iridologist or Practitioner on a budget that needs to be portable, and wants to take high quality images, then the eyePIX Handheld is for you.

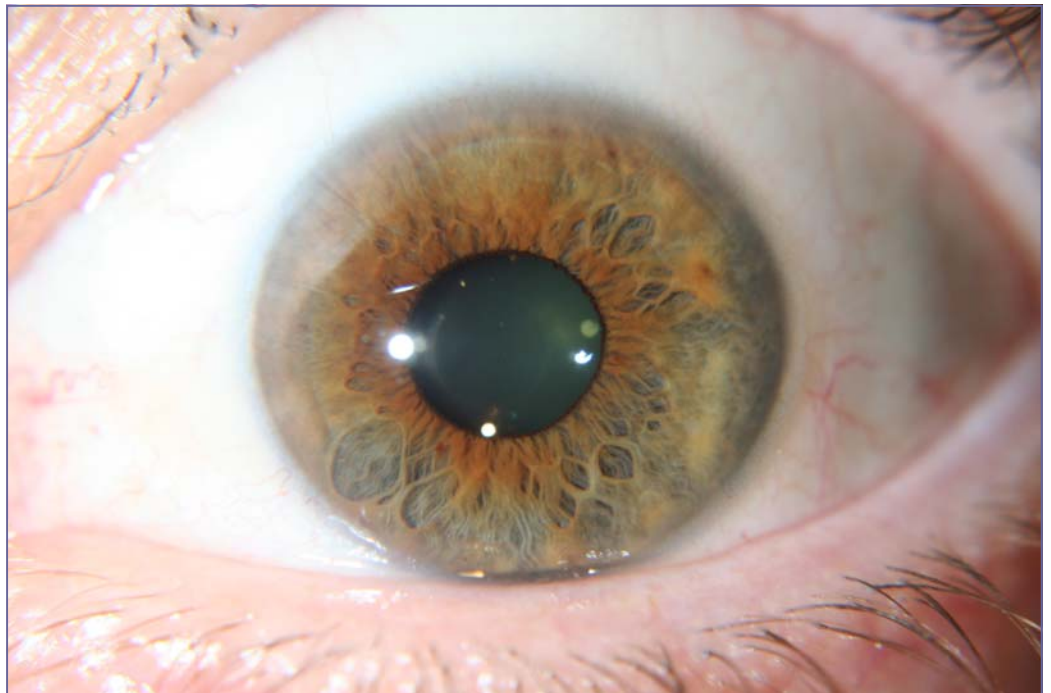

**Small, Lightweight & Portable**

**8 Megapixel Camera**
